

Christine Ramsden

UI / Front End Developer

JOB EXPERIENCE

FRONT END DEVELOPER: THE GUARDIAN, 2015 - 2016

Working within the mobile apps team, as the sole front end developer. Maintaining the webviews consumed by both the iOS and Android applications. The Windows 10 application was developed during the latter half of 2015, and it was my responsibility to ensure existing webviews worked correctly within the Edge webview. Responsibilities included maintaining, and improving existing designs, and implementing new features.

UI DEVELOPER: HARRODS, 2015

Working within a small team of UI developers, maintaining the harrods.com ecommerce solution. Recently involved in the BorderFree integration with the checkout area. Currently working on the replatforming project, which has included writing javascript modules for both the front facing site and back office merchandising tools, creating clean responsive html and writing a custom sass grid system.

FRONT END DEVELOPER: CONDE NAST DIGITAL, 2014-2015

Part of a small team maintaining and improving websites of the 12 UK brands of Conde Nast Publications, including Vogue, Glamour, GQ, Wired & CN Traveller. Along with maintaining the existing sites, I have been involved in creating custom Javascript components that can be shared across all brands. In addition I have worked on custom solutions for advertisers.

FRONT END DEVELOPER: PING WORKS (SYDNEY), 2012-2013

Front end development from PSD to completion utilising HTML5, CSS3, Javascript (jQuery and Custom). Mobile and responsive development, utilising best practices. Liaise with back end developers to scope requirements. Liaise with designers when design tweaks are needed.

OWNER / LEAD DEVELOPER: PIXOFIRM (PERTH), 2008-2012

Handled all aspects of business operations and sales - finding leads, creating proposals and closing deals. Managed freelance designers. Map out architecture for custom applications. Front end development utilising HTML, CSS & JavaScript. Back end development using mainly LAMP stack.

WEB DEVELOPER: REIWA (PERTH), 2002-2009

Work with other business units to develop requirements. Plan, design, manage and implement new projects. Front end development utilising (x)HTML, CSS & JavaScript. Back end development using ColdFusion and Oracle DB. Maintain & improve web applications.
